

Esquire Bank and BancVue Introduce a Plan of Partnership

Esquire Bank are proud to have formed a bank that serves as a terrific alternative to conventional, everyday banking. In particular, we strive to be everything the “Too Big to Fail” banks are not: client focused, responsive, nimble, and above all else, financially sound.

Esquire Bank is one of the few banks in the country that is table-set for continuous growth and prosperity. Having not only survived, but thrived during the most shocking financial crisis of our time, Esquire Bank is growing and growing.

Our growth plan has lead us to a key strategic initiative: **Bring a world class web presence to our national audience of clients and deliver unequaled products and services.**

In keeping with this initiative, Esquire Bank also intends to expand our client audience to include **consumers** to our current mix of attorney and business clients. To deliver this strategic initiative to our clients, Esquire Bank has partnered with BancVue, award-winning innovators helping financial institutions to regain market share from irresponsible megabanks.

With this new partnership, Esquire now delivers:

- World class consumer products that rival any offering of a money center bank
- A new online account opening procedure that can make you a client in under 7 minutes
- Incredibly smooth access for our national customers
- A world class business partner that truly understands the wants and needs of the **consumer**

One of the most noticeable results of our partnership with BancVue is the development of our new website. The new EsquireBank.com is a user-friendly site designed to act as a **virtual branch** for all our customers and potential customers. Together with BancVue, Esquire Bank is bringing **white glove service** to the digital age.
