

Making Our Case

With Case Cost Financing...a winning proposition

\$500,000 not tied up in case costs could **appreciate** to \$652,463 in five years and \$1,770,119 in twenty years.

Without Case Cost Financing...a losing proposition

\$500,000 tied up in case costs will not grow but instead could **depreciate** to \$413,808 in five years and \$203,544 in twenty years.

Dollars Over Time **With** and **Without** Case Cost Financing

Based on 4.62% average inflation since 1970 and S&P total return of 11.5% average since 1971

This is an example based on historical results. Actual appreciation or depreciation of case costs may vary. Esquire Bank makes no representations with respect to actual appreciation or depreciation.
